WASHINGTON CITY, March 16, 1848.

On Friday last, as you know, the Treaty was ratified by the Senate. In the House, it being private hill day, nothing of interest or importance occurred save a chunk of a fight between Mr. Haralson of Georgia, and Mr. Jones of Tennessee. The fight was brought about by "jist nothing at all," as Pat said his "skrimmages" were. The first intimation the House had of it, was seeing them cracking away at each other across a desk, as the boys in my day used to take it across a handkerchief. They were parted, and, after blowing awhile, the matter having seen made up, and the usual apologies having been endered, the affair was dropped—the members being satisfied that the fight was purely accidental. On Saturday neither House met.

On Monday the Senate did not sit, and in the House it was Resolution day. No Resolutions of interest or importance were brought forward. On Tuesday, as you have seen, Senator Sevier, of Arkansas, was nominated and confirmed for the mission to Mexico. The session of the day was altogether secret. Of this more anon.

In the House, on Tuesday, Tompkins of Mississippi made once again the speech he had previously spoken, with very slight variations. Of course he abused the President like a good fellow. Stanton of Tennessee followed, making in reply to Tompkins his hest Congressional speech.

An intimation from Mr. Calhoun of a desire speak on the Ten Regiment Bill, alone prevented the vote from being taken yesterday in the Senate. Our friends are satisfied that the bill will be carried.

The House yesterday, besides listening to an important speech from Root, of Ohio, had up a bill prepared by Gen. McKay, to provide that monies accruing to the United States shall not be used by the Government until they may have regularly passed into the Treasury. Upon this bill quite a long conversational debate took place. Mr. Root's speech was deivered on the question of the reference of the Message declining to transmit to the House the Slidell correspondence. It was important, because it was the third round fired by "conscience" into expediency Whiggery, which is now nearly demolished. The first was the speech of the redoubtable Joshuathe Whig leader-of which I have before written you; the second was the letter from Mr. Botts, of which I shall discourse you presently-Root's speech bringing up the rear. The latter laid down the law emphatically, and in language that every Southern member understood. He declared that a Convention must be held, and that it must nominate a genuine Whig—one who, besides being a Whig all over, must stand up for the Wilmot Proviso, pledging himself to it, and adopting it as the leading and most cardinal feature of the Whig creed. Otherwise, said Mr. Root, the Whig party is to be non est. No other than such a Candidate can get 10,000 Whig votes in Ohio, nor can he carry a single Federal non-slaveholding State. Taylorism has knocked under without even a show of a Congressional fight. After Root concluded, Toombs of Georgia wrote to his people neither to come nor send Delegates "to their d Convention." So say the quid nuncs.

On Tuesday morning, at every turn, one was met with the questions-is there to be a Commissioner to Mexico; and if so, who is to be the man? It was considered of the first importance on all hands, specially in view of all the circumstances, that further negotiations or arrangements should be commit-ted to the hands of some eminent statesman; and it ted to the hands of some eminent statesman; and it was thought that the Senate had advised the appointment of a Commissioner, and that the President was ty. Lady Dufferin, as we have seen, has been the about to follow up their advice. Many supposed that Col. Benton was to have been the man; but the fact that he had steadily opposed the ratification of the Tready, probably did, as it should, preclude all thought of thus employing him. The quid nuncs say that the Colonel was ambitious for the post. This can hardly be true; for although he has at times queer notions where self is concerned, he is too well read in matters 'diplomatic not to know that his opposition to the Treaty unfitted him for the duty of

achieving its consummation.

The world of quid nuncs about Washington are anxiously awaiting the expected letter from "the terrible Botts" showing up the identity between Taylorism at the South and Tylerism, as the Tribune lately demonstrated, beyond further cavil, that at the North the new ism is but another name for Nativeism. You may rely on it, this blow from Botts proves to be a cruel one, for he is not the man to mince matters. Indeed, he was shamefully treated at the late Virginia State Federal Convention, in which Phunkeyism successfully bearded him-the lion in his own den. Botts could have stood the thrushing-out, had it been fairly done; but the weapons with which he was demolished having been false telegraphic statements relative to the action of the Federal State Conventions for Kentucky and North Carolina, he had too much judgment not to know that he was not beaten, but temporarily cheated out of his position as Director General and Junior Embodiment in and for the ancient Commonwealth. The truth is, Taylorism and Clayism in this quarter are like two cats hitched by son, young Dufferin, giving evidence of the vitality the tails and strung across a pole. The way they have pitched into each other, spitting, scratching, screeching, and biting, is "a caution.

Mr. Clark Mills, the self-taught artist from Charleston, South Carolina, has brought to Washington a model of an Equestrian Statue of ANDREW JACKson, which, if he can get the order, he proposes to erect for the Jackson Monument Committee. It is somewhat after the fashion of the famous statue of Peter the great; that is, the horse is represented rearing. It is, however, in the costume strictly American. At first sight the horse appears heavy out of proportion to the figure of the General; but the work represents Jackson at the time of the battle of New Orleans, when, though six feet two inches high, he weighed but a hundred and thirty pounds. The artist has evidently studied to keep true to nature; and, in succeeding, will be conceived, by persons not recollecting the General's proportions, to have sacrificed the graceful effect at which all his profession aim. On the whole, this work is as strikingly beautiful as any thing of the kind I ever beheld. In Washington we have been nauseated with specimens of the art representing American subjects sandaled, after the fashion of the Greek, and togaed, like the Roman. Greenough, in his colossal statue of WASH-INGTON, presents a figure which folks from the country will at times mistake for any thing else but a representation of a great American. In this respect, Mr. Mills has certainly hit the taste of his fellowcitizens, for he presents simply the American General. Most of the Senate's session of Tuesday was devoted to a discussion with closed doors, upon the propriety of taking off the injunction of secrecy which appears to sit so heavily upon the members at large. I have no doubt the debate was spicy enough-replete with crimination and re-crimination. The appearance of the Treaty in the New York gressional circles. There can be no question that that Messrs. Mangum and Clayton, who were accused of making the revelations, had to deny positively all agency in the matter. Whoever the man may be write him down a Whig, as the Whig papers only contained any such information. By the by, a day or two since a Senator and a "Washington Correspondent" were in conversation upon the subject matter of the Treaty, when the former found the latter

The Federal leaders on Tuesday "pronounced" on the Treaty through the National Intelligencerthat "organ of foreign influences." They go for the denounce it. They swear that further acquisitions will produce the dissolution of this government; and in the same breath predict, as it were, that in twenty should not hesitate to accept the Treaty as ratified, and almost in the next paragraph they affirm, in effect, that it extorts concessions from her disgrace-ful to civilization and dishonorable to the fair fame of our country! The Federal leaders-poor fellows! he people will give the Democracy credit not only stead of negative, as reported.

for having fought the war, but for having brought about an honorable peace; and they find that their vile falsehoods against the President and the Democratic party in regard to the conquest and annexation of the whole of Mexico, are exploding into thin air; and no wonder they are in an ill humor. But they betake themselves to their never-failing resource—they blackguard their country, its government, and the Democracy. To be sure, this is done in very choice English. The periods are rounded by an artistical pen, which transtates the rascally lies and mendacious insinuations of such writers as Prentice or about \$22,000 in merchandise." What the merchand Parson Brownlow into language so highly polished dise, was, and how it was to be disposed of, may be it" also. What have they made by it? They vili- mix one gallon of water with one of whiskey. 1842 was the issue. How much have they netted lars per gallon! out of all this? Some one should double-rule-of-three the result of their former tirades of abuse upon Democratic Administrations, and tell us what they are to "take" by their abuse of President Polk and the Mexican war. Not the "hat," your readers may rely on it. The Presidency is now farther from the grasp of any or all of the Federal leaders, than it has been at any time since Gen, Jackson was chosen.

In the Senate, to-day, we had Mr. Calhoun's Speech, in which he handled the President without loves. No Whig has made a more violent anti-Administration Speech this winter. Mr. Badger also made a Speech, which I did not hear; but I learn that it was "agin" the Pope, Catholicism, the Devil, and the Mission to Rome, which was then un-HALIFAX.

THE SHERIDAN FAMILY. The London Correspondent of Holden's Dollar Magazine gives the following graphic and interest-

ing account of the Sheridan family: "One of the celebrities of the week has been Lord Dufferin, who made an exceedingly witty and sensible speech, (as you will have seen,) at a rent dinner on his estates in the County Down. The wit of the speech would be remarkable under any circumstances, or coming from any one; but it is doubly so, as showing a continuation of that extraordinary heritage of genius enjoyed by the Sheridan family for so many generations. Of course you know that his lordship -only just of age-is a Sheridan on the side of his mother-daughter of the "all-accomplished Tom" -grand-daughter of the immortal Richard Brinsley. She was better known as the Honourable Mrs. Blackwood, her husband having died on board the Reindeer steamer, from an overdose of morphing, soon after he succeeded to the 'tla, and she has since lived comparatively as secluded as her sister, Mrs. Norton. One can never mention the names of any members ing female representatives of the great mental dynaswife, and is mother of a peer. Lord Grantley is an old man now, and his heir being his brother, Mr. Norton, the "Sorrows of Rosalie" are certain to be soon gilded by a coronet, and the "Undying One" will be the parent of a long line of peers. His Grace of Somerset is considerably upwards of seventy, consequently, the day cannot be very far distant when the brow of the Queen of Beauty, (Lady Seymour,) will be encircled by the strawberry leaves inherit ed from the Great Protector Somerset, and she will be the maternal head of some powerful and highly connected families in the empire. Each of these ladies, it is old news to tell, is as distinguished for intellectual endowments, as for personal charms that have become proverbial. Each of their three dead brothers had the leading Sheridan characteristics, and so, in a large degree, has their surviving brother, the member for Shaftesbury, who is a genial country gentleman Swift's, and a translator of the "Satires of Perseus." His third son was the author of "The Dictionary:" married the authoress of several comedies and other works of great repute in their time, some being read to this day; and became the father of the Sheridan, of whom Byron said that he was "focus alone of all the rays of fame." And now we have the great grand-

"Under these circumstances we experienced some difficulty in determining on our course. We really quintals. had not obtained our own consent to put his name at our editorial head. Since then we have seen his Address to the Convention, accepting the nomination. We may say that this has decided us to support his claims to the Executive Chair. It is conceived in monwealth, showed that there were from 1,200 to an excellent spirit, and uttered with a commendable 1,300 of that unfortunate class, and also the astounding modesty and good taste. The reflection, also, that fact that 1,100 to 1,200 of them were born of drunken the times, and the issues between the two parties, parents! are too momentous, for any Whig to prove recreant, or fail to support the nominee of his party, has assisted us in forming our determination. And we now run up his name, expecting to give him our support, be it much or little.

THE THOROUGH BLOODED HORSE SARPEDON.

BEAUTIFUL dark bay, 10 years old this spring 15 hands high, of an excellent form, great muscular power, clean bone, sound constitution, good temper, and of a most desirable cross, as will be seen by his pedi-gree, combining the best English racing with the best American quarter and half-mile stock, and whose immediate progenitors are surpassed by few if any, will stand this season, commencing the first day of March and ending the 15th day of June, at Wm Bailey's in Granville, at Rolesville, Wake, at Mrs. Nichol's, Wake, Robert Gullev's, Johnston, at Smithfield, at Finch's Store, Johnston, and in the vicinity of Raleigh.

mare is ascertained to be with foal, the property changed or about to be removed from the State; with twenty-five cents to the groom in every case. Those who pay \$5 for the leap, may put the residue of the season for \$3 only.

He will attend his stands regularly, unless prevented He will attend his stands regularly, unless prevented by sickness or other unavoidable aecidents, or on public days in the neighborhood of his stands. I have directed the groom to take great care to prevent accidents, but I will not be responsible for any.

Sevendar's size was successful on the Turf in Facland.

Sarpedon's sire was successful on the Turf in England and stands in the first class of the imported stock in this country. His dam, independent of being hard to beat in a half-mile race, is apparently as sound as ever, with good eyes, although she has seen very hard service, and is 18 years old this spring. Her figure, proportion, power, and character are not exceeded by any horse I have ever seen. I have several certificates to prove that she has drawn on steep hill-sides more than 5000 lbs., (the weight of the wagon included) at the fifth chain; which surpasses even the English Draft-horse. She is quick, gentle, very spirited, true to pull, easily kept in order, and trots elegantly. The qualities of her stock (Brimmer of Kentucky)

are fleetness, power, durability and longevity. Those wishing to rear carriage-horses particularly would do well to try Sarpedon; as he is a fast trotter, and his colts are generally very fine. Those put to use are

highly prized. He has proved to be a sure foal-getter. Sarpedon and his dam, each buckle 18 hands in the girth. The latter is WILL, E. WYCHE. a shade darker.

PEDIGREE. Sarpedon was got by Sarpedon (Imported) at the cost of \$100-one of the best thorough-bred horses, whose performances on the turf are sufficiently known. His dam was got by Brimmer and he by Brimmer the celebrated quarter-horse, that was never beat in his life. 698\_4+
